We are seeking an experienced, highly motivated and reliable individual to join our IT Department at Ah Liki Wholesale Company. A well organized, detail-oriented work ethic is a must.

1. NETWORK ADMINISTRATOR

Salary: \$65,000.00 - \$85,000.00 per annum

The Network Administrator is largely responsible for managing, designing and monitoring all networking infrastructure services of the organization to ensure network availability, reliability and implementing high level network security measures. The role includes supervising IT technicians in daily helpdesk support and conducting any necessary network maintenance. You must be comfortable in a diverse, fast-paced environment and able to analyze data to translate results into better solutions. The ideal candidate should be able to deploy, configure, maintain and monitor all active network equipments to ensure 24/7 uptime of the organization's network infrastructure. Ability to work collaboratively with the Systems Administrator and Database Administrator to enable smooth IT operations on a daily basis.

The key responsibilities include but are not limited to the following:

- Install and integrate networking hardware and applications both wired and wireless
- Manage and monitor day-to-day IT network equipments and systems
- Oversee troubleshooting of all core network equipments and systems
- Ensure network security access both wired and wireless for all users are evaluated based on required network security requirements.
- Provide helpdesk support towards network issues and respond to IT support requests
- Ability to escalate IT technicians and leverage network resources to support user access
- Install, configure and maintain firewalls, network switches, wireless Access Points
- Install, configure and update network security improvements as required and implement Endpoint Security applications and document installation procedures
- Keep and maintain inventory of networking equipments, softwares and licenses
- Ensure high level network security and implement/upgrade new network security measures when required
- Monitor network performance and reliability (availability, throughput and latency)
- Modify networking configurations, isolate network vulnerabilities and define network policies and procedures
- Specify wireless network requirements and design cost effective network solutions
- Research and make recommendations on latest networking equipment or technologies
- Ability to think on your feet when general networking issues arises

Experience/ Education /Knowledge Requirements:

- Bachelor's degree in Computer Science or related field
- A Microsoft Certified System Engineer (MCSE) and/or Microsoft Certified Professional (MCP)
- A Cisco Certified Network Associate (CCNA) and/or CWNA
- High level hands on experience with Microsoft Windows 10 and Server Operating Systems 2012 R2, 2016 and/or 2019
- Minimum 5 years of relevant IT experience in a previous role in commercial environment or equivalent work experience.
- Solid understanding of Cisco, Meraki, Sophos, Mikrotik, Cambium, Mimosa and Aruba network equipments
- High level experience on Wireless LAN and WWAN design, setup and maintaining of wireless network equipments (WiFi versions 11n, 11ac, 11ax)
- High level hands on experience on Firewalls, SDWAN, VPN's, VLANS, Camera NVRs
- Solid understanding of VoIP systems such as Avaya and Grandstream
- High level experience in networking management support and updated knowledge of new networking systems and trends
- Advanced hands on experience with Network Monitoring Tools, MS Active Directory, Domain, DNS, DHCP, RADIUS authentication and NAS devices
- Excellent knowledge of best practices networking, routing, switching, network cabling and monitoring of the whole network infrastructure
- Ability to multitask, prioritize, and manage time efficiently
- Accurate, articulate, common sense driven and precise attention to detail
- Strong written and verbal communication skills
- Good interpersonal and communication skills with all levels of management and staff
